To learn through teaching

Digital Learning Space...a turnkey solution for the design and management of training programs and facilities

Design, Development & Management

As Chatham Tech expands digital literacy and workforce solutions to meet increasing demand, we recognize the importance of delivering training courses and development programs within physical and virtual environments designed to maximize student engagement and interaction. Therefore, we have partnered with a unique team of professionals experienced in the design and development of learning spaces to enhance your training success.

Chatham Tech offers 21st century training lab solutions that represent new standards for learning environments. Their innovative design strategies, products, and applications improve the functionality of the learning space for both students and instructors. Their designs support every stage of the learning process: information access, understanding, transfer, and assessment. From concept to installation, we understand how spatial design and technology should combine to:

- Foster collaboration and teamwork within large and small groups alike.
- Support multiple teaching and learning styles.
- Free the instructor to teach from any location within the space.
- Improve student interaction and team building
- Enhance the visualization of content through innovative products and solutions.

PVH-Advisors, LLC has extensive experience in all aspects of facilities planning, design and construction. Adept in the formation and management of diverse teams, especially within multilayered and complex organizational structures, PVH-Advisors supports client organizations as they develop processes, standards, prototypes and best-practices that promote consistency, ease of maintenance and brand recognition for the bottom line.

Experienced in the development of design standards, construction guidelines and nationwide contractor management, PVH-Advisors is positioned to support a range of planning, design and management projects. Focusing on educational facilities, the LEED accredited architectural staff at PVH-Advisors has worked with government leadership, grant holders and community representatives to manage school district and charter school facility budgets in excess of \$300,000,000 across the USA.

Assisted by PVH-Advisors, LLC and other partners, Chatham Tech offers a high quality turnkey training solution, including space design and construction, technology selection, curriculum development and program management to large and small organizations nationwide.
